

W10: QGIS for Geoscientists

Coordinator(s)	Grant Boxer
Date(s)	Sun, Sep 01
Time	08:45 - 16:45
Location	Crown Perth
Summary	QGIS is a free open sources GIS package with extensive capabilities for import, analysis and display of geoscientific data. The workshop will provide an introduction to QGIS followed by a series of hands-on workshop tasks to familiarise the user to the QGIS environment. Tasks include compiling a map for printing, and the import and display of field data, geochemistry, geophysics and satellite data.

Schedule*	<p><u>Session 1</u> Overview of QGIS</p> <p><u>Session 2</u> Making a map and adding geological information</p> <p><u>Session 3</u> Displaying geochemical and geophysical data</p> <p><u>Session 4</u> Viewing data in 3D and using satellite imagery in QGIS</p>
